

Stay Cool Windsor Essex!

Keeping the people of Windsor-Essex informed and aware of extreme heat and what to do to protect yourself is important. Windsor was chosen by Health Canada as one of four communities to develop a heat alert response system. The HARS Advisory Committee members have aligned strategic partners to ensure the message reaches the people of the region. DMG worked with the team to design a campaign that informs and educates the status and degree of the heat alert in a timely way with tips for how you can protect yourself.
